

## Ogden City Corporation

### Request for Bid

#### Mapping City-Owned Light Poles, Streetlights, and Electrical Lines Services

#### Q & A

---

1)With question deadlines today, 5 business days till the deadline and a physical delivery requirement, would the city consider an extension to the deadline?

Deadline has been extended to October 11, 2023. Sealed bids must be received no later than 10 AM that day. Refer to RFB for submittal process.

2)Based on the objectives on page 3, is this project meant to be a streetlight and streetlight circuit mapping scope only. Exhibit A seems to include additional information regarding distribution assets, so we want to be sure we are not over scoping the project.

Exhibit A explains what we are looking for.

2)Do you want secondary infrastructure included in this project or just primary?

It is assumed that by "primary", you mean a transmission line. To the best of our knowledge, we do not have any transmission lines. We are asking the bidder to identify where we connect to Rocky Mountain Power's source, map our electrical lines that are after Rocky Mountain Power's connection source and map the light poles our wiring feeds. A small amount of wiring will feed electrical outlets that are used for downtown Christmas lights and power to tie in automatic sprinklers to water trees in the downtown area. We are asking the winning bidder to identify the whether the electrical line feeds a light pole, several light poles, downtown electrical outlets used for Christmas lights or electrical used for downtown automatic sprinklers.

3) Are you looking to determine where each custom connection is fed from

Yes

## ***Purchasing Division***

4)Are you only wanting voltages on the distribution side before the transformer or do you want it to include voltage on every branch circuit through the secondary?

Voltage on every branch circuit though the secondary.

5)Do we have any rocky mountain power records that can be provided?

We do have some information Rocky Mountain Power has given us, but we found a lot of it was not completely accurate. We will supply the winning bidder with all of the records we have.
